

Attic and crawl space mould

Worried about mould in your attic or crawl space? Has a Home Inspector found mould in your dream home?

Medallion Healthy Homes has an environmentally friendly process that can effectively eliminate mould without you having to mortgage the home – again!

Our products are scientifically proven and our results are verified by a third party laboratory, and then backed by a 20-year transferable warranty. Call us today!

Mould prevention for new construction

Recent media reports have confirmed mould is a serious issue in new building construction. Builders – both residential and commercial – need a solution and Medallion Healthy Homes has the answer – New Build 30.

- New Build 30 is a cleaner and sealant that shields new construction materials from mould, mildew and bacteria.
- New Build 30 can be applied to both structure and drywall.
- The product is backed by a 30-year warranty when applied by a trained applicator.

Mould – what are the risks?

Black mould, other moulds, and fungi can be found almost anywhere and require very little to survive. Moisture, oxygen and a food source are all that is needed for mould to thrive, and our homes provide the ideal habitat. Mould growth can occur in as little as 24-48 hours.

Health effects of mould exposure:

- skin irritations, stuffy nose, irritated eyes
- shortness of breath, wheezing or difficulty breathing
- exacerbation of any underlying illnesses including asthma
- neurological disorders and death

People at increased risk:

- infants, children, and the elderly
- women who are pregnant or nursing
- anyone with a compromised immune system

Ozone – why is it used and what is it?

Are you a realtor trying to sell a house that smells of cigarette smoke or an unwanted odour?

Do you or your children suffer from allergies and asthma and want to ensure your home is free of allergens?

Have you recently suffered from a serious flu virus and want to purify your home?

Do you want to install new carpet but are worried about chemical smells?

Medallion uses one of the safest and effective methodologies for purifying a home – UV light ozone technology.

- Ozone is a fast acting oxidizing agent known as “Mother Nature’s Perfect Purifier”
- The oxidizing power of ozone serves as the perfect medium for the elimination of viruses, bacteria, mould spores, volatile off-gassing chemicals (VOCs) and offensive odours
- Medallion makes “clean” ozone that is free of any harmful by-products like nitric acids or oxides
- Medallion’s purification methodology ensures that there is no risk to you or your family.

Services we provide
